

Supporting Drilling Information to C2 Exploration Release

This document provides supporting drill collar locations of the C2 porphyry drilling program referenced in the announcement “SSR Mining Announces Exploration Results on the In-Pit Copper-Gold Porphyry C2 Target at Çöpler”, dated November 25, 2020.

Drill collar locations are surveyed in UTM Zone 37N, ED50 grid using differential GPS in units of meters. All drilling was diamond core drilling with NQ, HQ and PQ core sizes. NQ is 47.6mm, HQ is 63.5mm and PQ is 85 mm in diameter.

Drill Collar Coordinates

Prospect	Hole ID	Easting	Northing	Elevation	Azimuth	Dip	End of Hole (m)
C2 Porphyry	CDD935	458709.14	4363646.86	1217.05	175	-70	449.10
	CDD940	459000.54	4363425.96	1310.92	240	-60	470.40
	CDD947	458558.01	4363835.27	1222.18	335	-80	434.30
	CDD955	458612.11	4363770.32	1222.32	140	-70	528.70
