

SSR Mining Inc. – Legal Notices for Website

Terms of Use

Please read the following terms and conditions of use (the “Terms of Use”) carefully before using the www.ssrmining.com website. By accessing this website, you acknowledge that you have read the Terms of Use and that you accept and will be bound by the Terms of Use. Do not use this website if you do not agree to the Terms of Use.

We may amend the Terms of Use from time to time without notice. Accordingly, you should periodically review the then-current Terms of Use to determine whether you wish to continue accessing this website. If you continue to access or use this website after revisions are posted, you will be deemed to have accepted those revisions.

In this website, “we”, “us”, “our”, the “Company” and “SSR Mining” refer to SSR Mining Inc. and our subsidiaries, affiliates and proportionate share of joint ventures.

Non-Commercial Individual Reference Use Only

The entire contents of this website are protected by copyright and may be used and copied for non-commercial, individual reference only. Any other use of the contents of this website is prohibited unless the user first obtains SSR Mining’s written permission.

No Warranties

The information on this website is provided: (a) solely for the user’s general knowledge; and (b) on an “as is” and “as available” basis without warranties, representations or conditions of any kind, whether express, implied or statutory, (including but not limited to implied warranties, representations or conditions of merchantability, fitness for a particular purpose and non-infringement) and that any such warranties, representations or conditions are hereby expressly disclaimed. We assume no responsibility for the completeness, accuracy and currency of the information contained in this website. We do not represent or warrant that functions contained in this website will be uninterrupted or error-free, that defects will be corrected, or that this website or the server that makes it available is free of viruses or other harmful components. We do not guarantee the sequence, timeliness, accuracy or completeness of any stock quotes available on this

website or other data displayed, and we are not liable or responsible in any way for any delays, inaccuracies or errors in any stock price information or data or in the transmission of any stock price information or data.

No Solicitation

The information on this website is not intended to and does not constitute an offering of securities in any jurisdiction and is not to be construed as a recommendation to buy or sell securities in any jurisdiction. We are subject to the securities laws of various jurisdictions. Information disclosed or provided by us pursuant to the securities laws of those jurisdictions is not intended to be in any way qualified, amended, modified or supplemented by the information otherwise available in, through or on this website and should not be used to make investment decisions involving our securities. Our Canadian and U.S. public filings can be viewed on SEDAR at www.sedar.com and on EDGAR at www.sec.gov, respectively.

Third Party Links

All links or references to other websites are provided merely as a convenience to the user. We have no control over the linked or referenced websites, make no representation or warranty regarding the completeness, accuracy, currency, timeliness or legality of the information located on the linked or referenced websites and do not endorse the linked or referenced websites or their content. We are not responsible for any damage or loss incurred as a result of the use of or reliance on the linked and referenced websites.

Cautionary Note to U.S. Investors

National Instrument 43-101 – *Standards of Disclosure for Mineral Projects* (“NI 43-101”) is a rule developed by the Canadian Securities Administrators that establishes standards for all public disclosure an issuer makes of scientific and technical information concerning mineral projects. Unless otherwise indicated, all Mineral Reserves and Mineral Resources estimates contained or incorporated by reference in this website have been prepared in accordance with NI 43-101 and the Canadian Institute of Mining, Metallurgy and Petroleum Definition Standards on Mineral Reserves and Mineral Resources and have not been prepared in accordance with the requirements of U.S. securities laws. These standards differ significantly from the requirements of the U.S. Securities and Exchange Commission (the “SEC”), and Mineral Reserve and Mineral Resource information contained or incorporated by reference in this website is not comparable to similar information disclosed by domestic U.S. reporting companies subject to the reporting and disclosure requirements of the SEC.

In particular, the reporting and disclosure requirements of the SEC apply different standards in order to classify mineralization as a reserve. As a result, the definitions of “Proven Mineral Reserves” and “Probable Mineral Reserves” used in NI 43-101 differ from the definitions in the reporting and disclosure requirements of the SEC. Under SEC standards, mineralization may not be classified as a “reserve” unless the determination has been made that the mineralization could be economically and legally produced or extracted at the time the reserve determination is made. Among other things, all necessary permits would be required to be in hand or issuance imminent

in order to classify mineralized material as reserves under the SEC standards. Accordingly, Mineral Reserves estimates included in this Annual Information Form may not qualify as “reserves” under SEC standards.

In this website, we use the terms “Mineral Resources,” “Measured Mineral Resources,” “Indicated Mineral Resources” and “Inferred Mineral Resources” to comply with the reporting standards in Canada. The reporting and disclosure requirements of the SEC do not recognize Mineral Resources and U.S. companies are generally not permitted to disclose resources in documents they file with the SEC. Furthermore, disclosure of “contained ounces” is permitted disclosure under Canadian regulations; however, the SEC only permits issuers to report mineralization that does not constitute “reserves” by SEC standards as in place tonnage and grade without reference to unit measures. Readers are specifically cautioned not to assume that all or any part of the mineral deposits in these categories will ever be converted into SEC defined mineral reserves.

Readers should also understand that “Inferred Mineral Resources” have a great amount of uncertainty as to their existence and as to whether they can be mined legally or economically. Therefore, readers are also cautioned not to assume that all or any part of an Inferred Mineral Resource exists. In accordance with Canadian rules, estimates of “Inferred Mineral Resources” cannot form the basis of feasibility or pre-feasibility studies. It cannot be assumed that all or any part of “Mineral Resources,” “Measured Mineral Resources,” “Indicated Mineral Resources” or “Inferred Mineral Resources” will ever be upgraded to a higher category. Readers are cautioned not to assume that any part of the “Mineral Resources,” “Measured Mineral Resources,” “Indicated Mineral Resources” or “Inferred Mineral Resources” included in this website is economically or legally mineable. In addition, the definitions of “Proven Mineral Reserves” and “Probable Mineral Reserves” under reporting standards in Canada differ in certain respects from the standards of the SEC. For the above reasons, information included in this website that describes our Mineral Reserves and Mineral Resources estimates is not comparable to similar information made public by U.S. companies subject to the reporting and disclosure requirements of the SEC.

NI 43-101 also permits an historical estimate made prior to the adoption of NI 43-101 that does not comply with NI 43-101 to be disclosed using the historical terminology if the disclosure: (a) identifies the source and date of the historical estimate; (b) comments on the relevance and reliability of the historical estimate; (c) to the extent known, provides the key assumptions, parameters, and methods used to prepare the historical estimate, (d) states whether the historical estimate uses categories other than those prescribed by NI 43-101, and if so, includes an explanation of the differences; (e) includes any more recent estimates or data available; (f) comments on work that needs to be done to upgrade or verify the historical estimate as current Mineral Resources or Mineral Reserves; and (g) states with equal prominence that (i) a qualified person has not done sufficient work to classify the historical estimate as current Mineral Resources or Mineral Reserves; and (ii) the historical estimate is not being treated as current Mineral Resources or Mineral Reserves.

We have not independently verified the accuracy of the information regarding the mining industry and other market data contained in this website. This information is not intended to provide and should not be relied upon for accounting, legal or tax advice or investment recommendations. You should consult your own advisors as to the accounting, legal, tax, regulatory, business, financial and related aspects of making an investment in SSR Mining.

Cautionary Note Regarding Forward-Looking Statements

This website and the documents incorporated by reference herein contain forward-looking information within the meaning of Canadian securities laws and forward-looking statements within the meaning of the U.S. Private Securities Litigation Reform Act of 1995 (collectively, “forward-looking statements”) concerning the anticipated developments in our operations in future periods, our planned exploration activities, the adequacy of our financial resources, and other events or conditions that may occur or exist in the future.

Generally, forward-looking statements can be identified by the use of words or phrases such as “expects,” “anticipates,” “plans,” “projects,” “estimates,” “assumes,” “intends,” “strategy,” “goals,” “objectives,” “potential,” “believes,” or variations thereof, or stating that certain actions, events or results “may,” “could,” “would,” “might” or “will” be taken, occur or be achieved, or the negative of any of these terms or similar expressions. These forward-looking statements are subject to a variety of known and unknown risks, uncertainties and other factors that could cause actual events or results to differ from those expressed or implied, including, without limitation, the following: uncertainty of production, development plans and cost estimates for the Marigold mine, the Seabee Gold Operation, Puna Operations and our projects; our ability to replace Mineral Reserves; our ability to successfully integrate the Chinchillas project, on a joint venture basis, into our current operations; commodity price fluctuations; political or economic instability and unexpected regulatory changes; currency and interest rate fluctuations; the possibility of future losses; general economic conditions; fully realizing the value of our shareholdings in Pretium Resources Inc. and our other marketable securities, due to changes in price, liquidity or disposal cost of such marketable securities; counterparty and market risks related to the sale of our concentrate and metals; uncertainty in the accuracy of Mineral Reserves and Mineral Resources estimates and in our ability to extract mineralization profitably; differences in U.S. and Canadian practices for reporting Mineral Reserves and Mineral Resources; lack of suitable infrastructure or damage to existing infrastructure; future development risks, including start-up delays and cost overruns; our ability to obtain adequate financing for further exploration and development programs and opportunities; uncertainty in acquiring additional commercially mineable mineral rights; delays in obtaining or failure to obtain governmental permits, or non-compliance with our permits; our ability to attract and retain qualified personnel and management; potential labour unrest, including labour actions by our unionized employees at Puna Operations; the impact of governmental regulations, including health, safety and environmental regulations, including increased costs and restrictions on operations due to compliance with such regulations; reclamation and closure requirements for our mineral properties; failure to effectively manage our tailings facilities; social and economic changes following closure of a mine may lead to adverse impacts and unrest; unpredictable risks and hazards related to the development and operation of a mine or mineral property that are beyond our control; indigenous peoples’ title claims and rights to consultation and accommodation may affect our existing operations as well as development projects and future acquisitions; assessments by taxation authorities in multiple jurisdictions; recoverability of VAT and significant delays in the collection process in Argentina; claims and legal proceedings, including adverse rulings in litigation against us and/or our directors or officers; compliance with anti-corruption laws and internal controls, and increased regulatory compliance costs; complying with emerging climate change regulations and the impact of climate change,

including extreme weather conditions; fully realizing our interest in deferred consideration received in connection with recent divestitures; uncertainties related to title to our mineral properties and the ability to obtain surface rights; the sufficiency of our insurance coverage; civil disobedience in the countries where our mineral properties are located; operational safety and security risks; actions required to be taken by us under human rights law; competition in the mining industry for mineral properties; our ability to complete and successfully integrate an announced acquisition; an event of default under our convertible notes may significantly reduce our liquidity and adversely affect our business; failure to meet covenants under our senior secured revolving credit facility; conflicts of interest that could arise from certain of our directors' and officers' involvement with other natural resource companies; information systems security threats; and those other various risks and uncertainties identified under the heading "Risk Factors" in our most recent Annual Information Form filed with the Canadian securities regulatory authorities and included in our most recent Annual Report on Form 40-F filed with the SEC.

This list is not exhaustive of the factors that may affect any of our forward-looking statements. Our forward-looking statements are based on what our management considers to be reasonable assumptions, beliefs, expectations and opinions based on the information currently available to it. Assumptions have been made regarding, among other things, our ability to carry on our exploration and development activities, our ability to meet our obligations under our property agreements, the timing and results of drilling programs, the discovery of Mineral Resources and Mineral Reserves on our mineral properties, the timely receipt of required approvals and permits, including those approvals and permits required for successful project permitting, construction and operation of our projects, the price of the minerals we produce, the costs of operating and exploration expenditures, our ability to operate in a safe, efficient and effective manner, our ability to obtain financing as and when required and on reasonable terms, and our ability to continue operating the Marigold mine, the Seabee Gold Operation and Puna Operations. You are cautioned that the foregoing list is not exhaustive of all factors and assumptions which may have been used. We cannot assure you that actual events, performance or results will be consistent with these forward-looking statements, and management's assumptions may prove to be incorrect. Our forward-looking statements reflect current expectations regarding future events and operating performance and speak only as of the date hereof and we do not assume any obligation to update forward-looking statements if circumstances or management's beliefs, expectations or opinions should change other than as required by applicable law. For the reasons set forth above, you should not place undue reliance on forward-looking statements.

Further information regarding these and other factors is included in our filings with the Canadian provincial securities regulatory authorities (which may be viewed at www.sedar.com) and the SEC (which may be viewed at www.sec.gov).

Use of Information
